

AMAKI QUANTUM

Dr. ION

Model: EZ-AH1500

**TECHNOLOGICAL INNOVATION
FOR A SUSTAINABLE FUTURE**

Dr. Gerald Pollack

Dr. Gerald Pollack, a scientist at the University of Washington (Seattle), is the researcher who discovered the fourth phase of water, known as EZ Water (Exclusion Zone Water). He explored its properties and implications in his renowned book, "The Fourth Phase of Water", published in 2013.

Characteristics of EZ Water:

- **Unique Structure:** EZ Water is believed to have a gel-like or crystalline structure, which differs from that of regular water. Water molecules in this zone form a more tightly ordered arrangement and are capable of storing energy.
- **Exclusion Zone:** This region of water exhibits the unique ability to exclude other substances (impurities), creating an area of highly purified water.
- **Energy Storage:** EZ Water can also store energy, which may help explain certain biological processes, such as supplying energy for cellular reactions.

Based on the principles of "QUANTUM MECHANICAL MAGNETIC FIELD" and the pioneering research of Professor Gerald Pollack on EZ Water, AMAKI QUANTUM Co., Ltd. proudly introduces the Dr. ION living machine—a groundbreaking innovation in water purification technology. The device is designed to activate and ionize water molecules, restructuring them into a hexagonal form, which enhances water circulation and improves nutrient absorption efficiency.

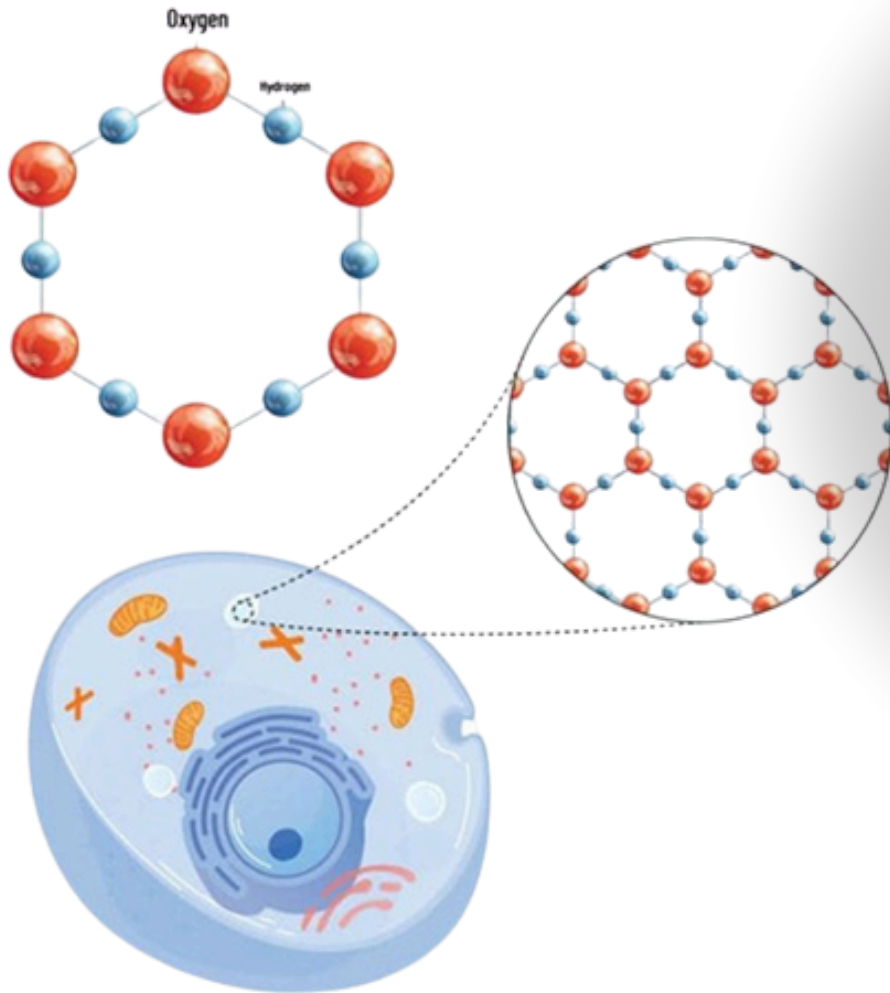

ION EZ Water, generated by the Dr. ION living machine, is a premium-grade ionized water: ultra-fine, highly conductive, ultra-fast, and energy-rich-making it highly beneficial for health. The DR. ION EZ-1500 model, with a filtration capacity of up to 1500 liters per hour, produces high-quality ION EZ water from nationally certified clean water sources, delivering exceptional benefits to users.

ION EZ Water from the Dr. ION

1.

Hexagonally structured water can easily penetrate into cells.

2.

Magnetically energized water helps restore cellular health.

3.

Water rich in free electrons has a strong ability to neutralize free radicals, providing excellent antioxidant effects

4.

Calcium is converted into soft aragonite, enhancing its ability to prevent scaling.

Why choose ION EZ Water?

- **Rich in Hydrogen Content:** The composition of the water contains a high concentration of hydrogen molecules. These active molecules act as powerful antioxidants, helping to eliminate disease-causing agents in the body, prevent aging, and improve skin health.
- **High and Diverse pH Levels:** After passing through the machine, neutral water with a pH of 7.0 is transformed into EZ ionized water with a higher pH ranging from 7.5 to 9.5. As a result, the water can help eliminate excess acid in the body, restore pH balance, and prevent certain acid-related conditions such as stomach ulcers, colitis, osteoporosis, gout, and more.
- **Small Molecular Size:** The molecules in EZ ionized water are ultra-small, measuring just 0.5 nanometers, which is five times smaller than regular water molecules. This allows the water to quickly permeate deep into the cells, rapidly delivering essential nutrients to the body while effectively supporting detoxification and cleansing.
- **Prevents and Inhibits the Growth of Free Radicals:** Thanks to the powerful antioxidant properties of hydrogen and the negative ORP (Oxidation-Reduction Potential) present in the water, it helps neutralize free radicals, boost the immune system, and protect cells from damage.

HYDROGEN-RICH PROPERTIES

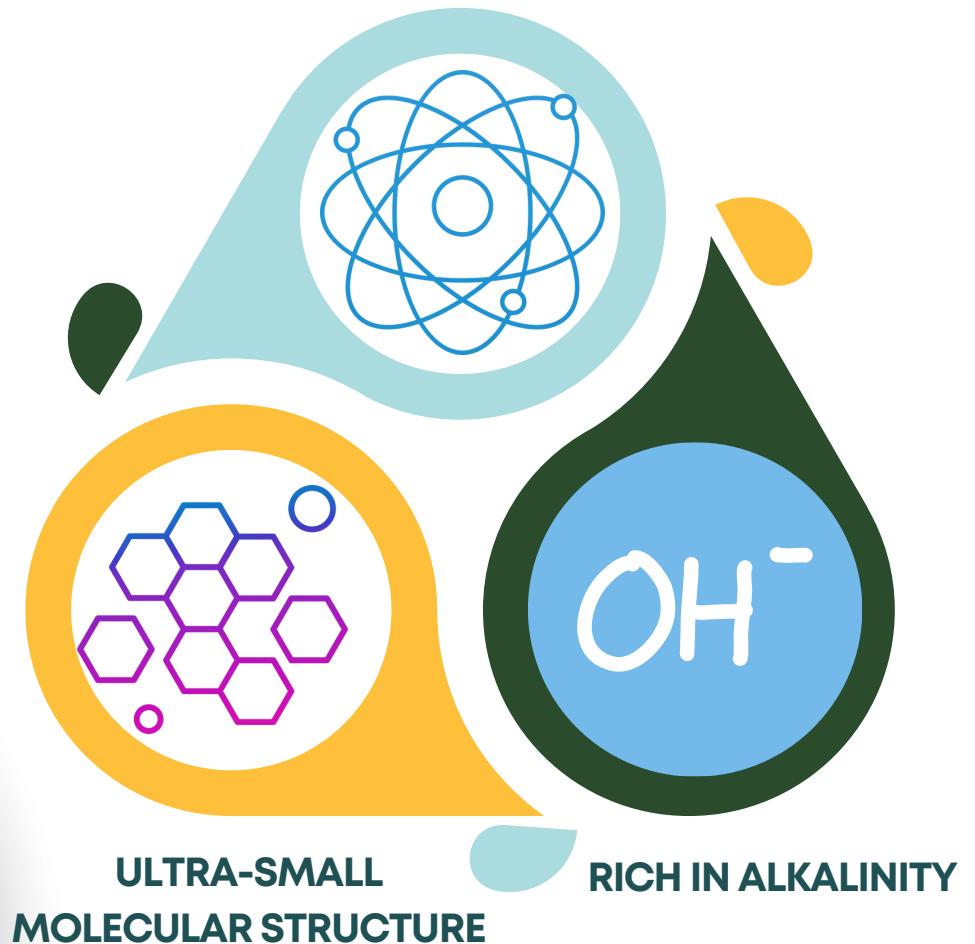

ION EZ Water contains essential compounds in ionic form, rich in hydrogen, and features ultra-small molecular structure with a pH level above 7.0. ION EZ Water is naturally alkaline due to its abundant hydrogen content, offering antioxidant properties, acid neutralization, and rapid absorption.

In addition to hydrogen, alkaline water also helps the body replenish essential trace minerals such as sodium, potassium, magnesium, calcium, and more.

ION EZ Water boasts many beneficial properties, supporting body nourishment and disease prevention.

The input water is thoroughly filtered to remove impurities, bacteria, and toxins through a filtration system, resulting in pure water.

**RICH IN HYDROGEN,
POWERFUL ANTIOXIDANT
PROPERTIES**

Operating Principle

The Dr. ION Living Machine is installed after the pump and does not require electricity. It operates through four filtration units:

- **Activated Carbon Filter**

Removes scale, heavy metals, and harmful impurities, ensuring clean water from the start.

- **Quantum Technology Processing Unit**

Uses multi-polar magnetic fields, molecular collision, and quantum magnetic field technology to break down large water molecule clusters and create EZ ionized water, which is beneficial for health.

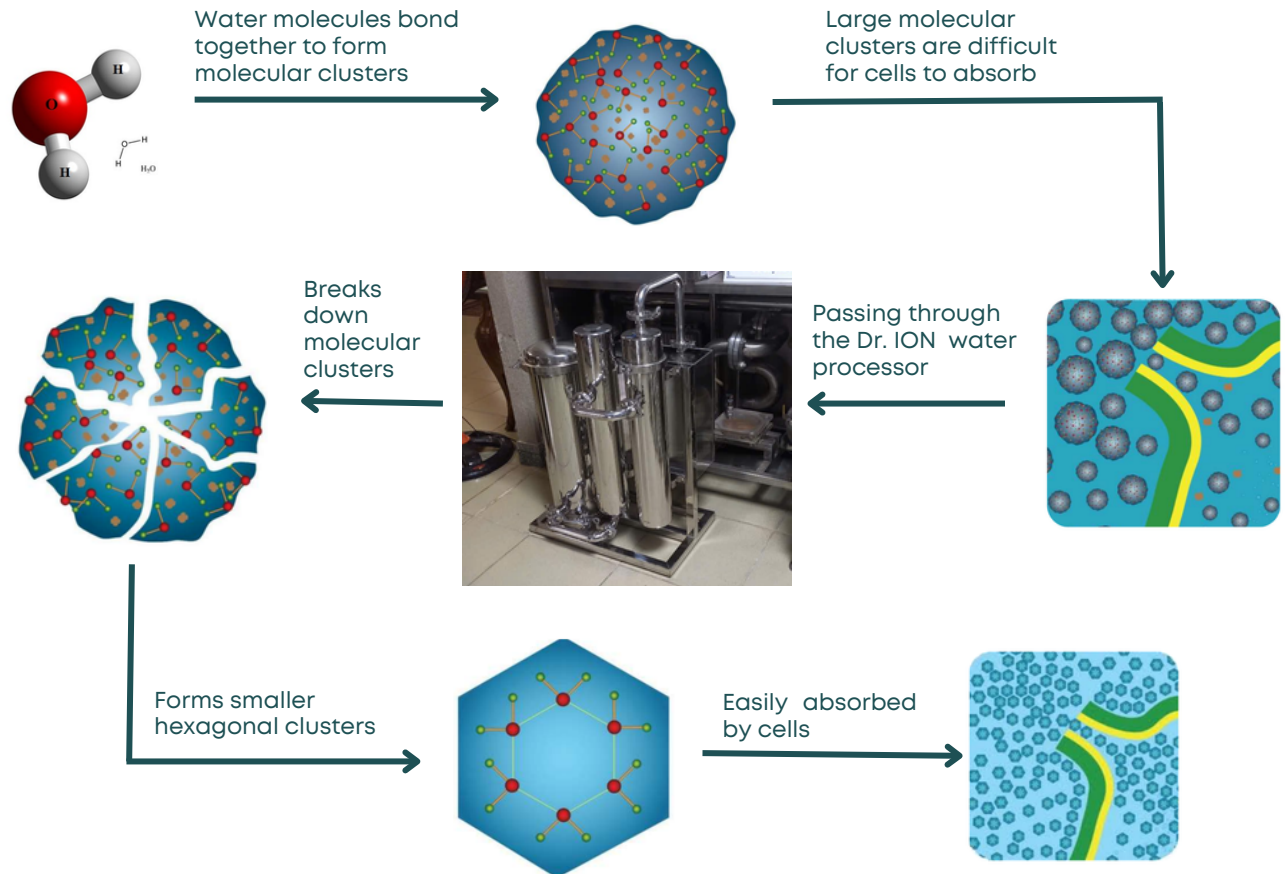

- **UF (Ultrafiltration) Filter**

Filters out dissolved solids that cause water hardness and retains even the tiniest microorganisms, ensuring purity of up to 99.9%.

- **Functional Filter Unit**

Composed of three functional filter cores, with a flow rate of 200 L/h.

The water meets drinking water standards, is clean, safe, and carries a negative charge, making it beneficial for health.
